

Helping to care for you in an EMERGENCY

Your 3 options;

1. You can choose to have a **Core Summary Record**

All patients unless they have opted out, have a Core Summary Record including basic information about their current medications such as allergies and any bad reactions they have had to medicines.

I choose this option (please tick)

2. You can choose to have a **enhanced Summary Care Record**

This means your record will contain the 'core' information PLUS extra information that you think would be helpful for the healthcare staff who treat you. You must give your explicit consent for this.

That extra information could include;

- Information about your long term health conditions – such as asthma, diabetes, heart problems or rare medication conditions.
- Your relevant medical history – clinical procedures you have had, why you need a particular medication & clinical advice to support your future.
- Your healthcare needs and personal preferences – you may have particular communication needs, long term condition that needs to be managed or you may have made legal decisions or preferences about your care.
- Immunisation information – details of previous vaccinations

I choose this option (please tick)

3. You can choose **NOT TO HAVE** a **Summary Care Record**

Information from your GP record concerning your current medications, allergies and bad reactions to medications will not be readily available to other services treating you. Fewer than 5% of patients have chosen to opt out.

I choose this option (please tick)
